

Customer Support Knowledge Base

Demo Support Document for the CrewAI + FAISS RAG Agent

1. Company and Product Overview

AcmeCloud is a fictional SaaS platform used by small and medium-sized businesses to manage customers, invoices, support tickets, team members, and reports. The product is available through a web application and provides role-based access for administrators, managers, and agents.

Support hours: Monday to Friday, 9:00 AM to 6:00 PM IST. Critical service outages are monitored outside support hours.

2. Account and Login Support

Password reset

Customers can reset their password from the login page by selecting **Forgot password**. They must enter the email address associated with the account. A password-reset link is sent by email and normally expires after 30 minutes. If the email is not received, the customer should check spam or junk folders and verify that the correct email address was entered.

Account locked

An account may be temporarily locked after five unsuccessful login attempts within 15 minutes. The lock normally expires automatically after 30 minutes. If access is still unavailable, support can verify the account and assist with unlocking it.

Changing an email address

Only an administrator can change the primary email address of an account. The user must be able to complete the verification process for the new email address.

3. Billing and Subscription

Subscription plans

Plan	Monthly Price	Users	Storage
Starter	\$19/month	5	10 GB
Business	\$49/month	25	100 GB
Enterprise	\$149/month	100	1 TB

Refund policy

Monthly subscriptions are eligible for a full refund if requested within 7 calendar days of the initial purchase. Renewal payments are refundable only when the request is made within 3 days of the renewal charge. Refunds are normally processed within 5 to 10 business days.

Payment failure

If a recurring payment fails, the system retries the payment up to three times over seven days. Customers should verify the card details and billing address. If all retries fail, the subscription may be suspended until a valid payment method is

provided.

4. Invoices and Billing Questions

Invoices can be downloaded from **Settings** → **Billing** → **Invoices**. Each invoice contains the subscription plan, billing period, taxes, payment status, and transaction reference. Customers who believe an invoice contains an incorrect charge should provide the invoice number when contacting support.

5. Technical Troubleshooting

Application is loading slowly

The customer should first refresh the page, clear the browser cache, and retry using a supported browser. Recommended browsers are the latest versions of Chrome, Edge, Firefox, and Safari. If the issue continues, the customer should provide the approximate time of the problem and the affected page.

Application shows an error

Customers should record the exact error message, refresh the page, and retry. If possible, they should provide a screenshot and the URL or feature where the error occurred. Do not request or store passwords, API secrets, or full payment-card numbers.

File upload failed

Supported document formats are PDF, DOCX, XLSX, CSV, JPG, and PNG. Individual files must be no larger than 25 MB. Customers should verify the file format and size, then retry the upload. If the file is within the supported limits and still fails, support should request the file name, file type, size, and approximate time of failure.

6. User and Team Management

Administrators can invite team members from **Settings** → **Team** → **Invite member**. Each invitation remains valid for 72 hours. Administrators can change a user's role or deactivate a user from the Team page. Deactivating a user immediately prevents login but does not delete historical records.

7. Data Export and Deletion

Administrators can export account data from **Settings** → **Data** → **Export**. Standard exports are generated asynchronously and are normally available within 30 minutes. Data deletion requests must be submitted by an authorized account administrator. Support should verify authorization before processing such requests.

8. API and Integration Support

API access is available on Business and Enterprise plans. API keys can be created from **Settings** → **Developer** → **API Keys**. API keys should be treated as secrets and must never be pasted into public tickets, email threads, or chat. If a key is exposed, the customer should revoke it immediately and create a replacement key.

Webhook deliveries are retried up to five times when the receiving endpoint does not return a successful HTTP response. Customers troubleshooting webhooks should provide the webhook event type, timestamp, HTTP status code, and a redacted response body.

9. Security and Privacy

Support agents must never ask customers for passwords, one-time authentication codes, full payment-card numbers, or secret API keys. Sensitive information included accidentally in a support request should be redacted from internal notes and logs whenever possible.

For account-security incidents, support should verify account ownership using the approved verification process before making account changes.

10. Common Frequently Asked Questions

Question	Answer
How do I reset my password?	Use Forgot password on the login page. The reset link normally expires after 30 minutes.
How long is a password reset link valid?	30 minutes.
How many failed logins cause a temporary lock?	Five unsuccessful login attempts within 15 minutes.
How long does an account lock last?	Normally 30 minutes.
What is the Starter plan price?	\$19 per month.
What is the Business plan price?	\$49 per month.
What is the Enterprise plan price?	\$149 per month.
How long do eligible refunds take?	Normally 5 to 10 business days after processing.
What is the maximum file upload size?	25 MB per file.
How long is a team invitation valid?	72 hours.
Which browsers are recommended?	The latest Chrome, Edge, Firefox, and Safari.

Document purpose: This is a fictional knowledge base created for testing a customer-support RAG application. It is not a real company's policy document.
